

Product Reconditioning Services

Revitalize Your Investment

It's not always possible to replace or repair a mail production system that is tired, has become obsolete or lacks necessary production capacity. Capital budgets continue to tighten, yet demand for high-efficiency production continues to rise. The bottom line is that you need to do more with less.

And you can with Bell and Howell's Product Reconditioning Services - a cost-effective alternative to completely replacing your capital equipment.

With our Product Reconditioning Services, you can select a ready-to-use reconditioned system from our inventory or we can help bring new life, capabilities and capacity to your existing system through one of our reconditioning services.

This new program recognizes that our customers are at the center of our business and you deserve a choice.

Whether you choose to purchase a complete system or to recondition your own system, you can select from three levels of reconditioning and associated warranties:

Level 1: Field Refurbished	Level 2: Factory Refurbished	Level 3: Factory Remanufactured
<ul style="list-style-type: none"> ➤ Project performed at the customer site by our field service team ➤ Full mechanical inspection ➤ Replace worn parts with 50% or less life ➤ Upgrades available through FCO process ➤ Cosmetic refresh ➤ Warranty terms available ➤ Remove service age charges 	<ul style="list-style-type: none"> ➤ Project performed at Bell and Howell by factory-trained technicians ➤ Complete inspection (mechanical and electrical) ➤ Replace worn parts with 50% or less life ➤ Replace missing or defective exterior covers and guards ➤ Repaint all covers and guards, blackening of guides and other visible parts ➤ Additional upgrades available through FCO process ➤ 60-day warranty 	<ul style="list-style-type: none"> ➤ Full mechanical and electrical inspection ➤ Complete tear down and rebuild necessary components ➤ Inspect and refurbish or replace all motors and drive system ➤ Install raceway improvements, deep groove insert plates, new insert pusher arm and new raceway hold downs and new stainless guides ➤ Update all electronics and control software when necessary ➤ Replace missing or defective exterior covers and guards ➤ Repaint all covers and guards, blackening of guides and other visible parts ➤ Additional upgrades available through FCO process ➤ 90-day warranty

Bell and Howell's IMb-Vestigate® uses the database of all read or printed IMBs, collected from mailpieces passing through the NetSort sorting systems, or captured in a mail.dat file. This data is compared to the IMb codes of the undocumented pieces from the USPS. The findings are quickly detailed and presented in a series of displayed data, text files, and reports. The data import method for these large batch style searches matches the format used by the USPS, making file format conversion unnecessary. When only a few samples are needed, you may perform simply queries for individual IMBs.

EXPERIENCED TECHNICAL SUPPORT

Integration and installation is supplied by the Bell and Howell Service organization upon initial purchase agreement. We have unsurpassed project planning and system set up. After your software is installed, Bell and Howell offers ongoing technical support and IMb-Vestigate® Software updates which are supplied through Software Maintenance Agreement.

With Product Reconditioning Services, improving the performance, capacity and/or efficiency of your operation is easier than ever.

While our primary focus is on mail production systems, we are also the trusted refurbishing partner to manufactures in other adjacent industries, including wide-format printing, robotics, and others. Our state-of-the art training center provides our remanufacturing and field service personnel with the tools and support necessary to ensure your equipment complies with original OEM specifications. Regardless of the level you choose, our services will transform your system to perform as if it were new.

The basic building blocks include:

Mailstar (Bell and Howell legacy inserters MS 350, MS 400, MS 500, BH 1000 or BH 3500, inserter only).

Mailstar VIP (choice of CL or LX feeder folder)

Mailstar AIM (addition of a Bell and Howell fully customizable Automated In-Line Mailing System feeder folder combination and control system.)

Pinnacle (Bell and Howell legacy 6 station legacy inserter)

Pinnacle VIP (choice of CL or LX feeder folder)

Note: we can source other pre-owned equipment - not just those listed above - based on availability and application need.

In addition, all Bell and Howell customers have their choice of several support programs that provide access to a global service infrastructure that includes 24x7 U.S.-based customer call center, technical assistance center and more than 600 mobile-enabled field service personnel deployed throughout North America and Western Europe.
