

CASS C8000

Card Attachment Secure System

Quick, individual and flexible card processing

Bell and Howell has teamed with Otto Künnecke to offer the CASS C8000 secure card attachment system.

For organizations that require absolute flexibility without compromise, a CASS C8000 configured for your needs is the ideal secure card attachment system.

At speeds of up to 6,000 cycles per hour, this powerful system is flexible enough to meet the demands of both custom or wide-ranging applications for secure card attachment. With its modularity, this system can grow and extend with your needs.

The CASS C8000 is ideal in environments where 7 x 24 operation is required, or where a large number of small job sizes are processed. In addition, the CASS C8000 offers amazing versatility and can operate as a single or multiple-channel inserting system without the card channel.

The CASS C8000 uses a Windows-based operating system, which allows for flexible data input. The CASS C8000 is relied upon day to day in secure card operations around the world.

With Bell and Howell service technicians at the ready to assist in all aspects of keeping the system up and running, Otto Künnecke and
