

Producer 400EVO Inserting System

KEY FEATURES

- Yields a low cost per piece, making your operation more competitive and profitable
- Highly robust cut sheet and continuous form input channels with heavy-duty folding for low-to-high page count applications
- Automatic rejection of collation errors in both the input channel and the base system increase productivity
- Feeder flexibility. Options include rotary, shuttle, friction and specialty feeders to handle the widest range of material types
- A true "in-line" inserting process reduces rework and maximizes operational efficiency
- Designed to last in a 24/7 production environment
- Low parts consumption providing increased machine availability with a low operating cost

Bell and Howell's Producer 400EVO Transactional Mail Inserter is designed for flexible, high-speed processing of letter and flat applications. Built for 24/7 production environments, this operator-friendly, heavy-duty inserter offers simple and easy-to-use setup enhancements, such as tool-less adjustments throughout the system, allowing for quick format and size changes by the operator.

With cycle speeds up to 25,000 per hour for letters and 8,000 per hour for flats, the Producer 400EVO will take your transactional mail operation to the next level without sacrificing flexibility, integrity or cost per piece.

The Producer 400EVO offers high-speed continuous form and cut-sheet inputs, with a robust heavy-duty folder for high-page counts. Available features include the sub-setting for folded and flat applications, automatic fold plates, and a format turn allowing the operator to quickly change from flat to folded applications.

The Producer family of insert feeders includes rotary, friction, shuttle, and specialty feeders. Enabling your operation to yield the highest possible performance and application flexibility.

The true in-line inserting approach allows for envelopes to feed in the same direction as the inserts and input channel, maximizing valuable floor space usage and improving operational efficiencies.

The Navigator™ system controller combines all the latest interactive technologies into a graphical user interface. Enabling dramatic improvements in usability,

operator and system productivity, reporting statistics and overall system management.

RELIABILITY AND SERVICE

Maximum uptime and availability starts here. From an extensive service footprint, 40,000+ parts at 40+ stocking locations, to the best service and support in the industry, we've got you covered. By combining turnkey project management, advanced analytics and flexible maintenance plans, you'll have the complete solution to ensure that your organization is running more efficient for longer.

OPTIONAL FEATURES

- Insert and document reading, matching and tracking using the Bell and Howell JETVision® advanced vision reading systems
- Ink-jet addressing with read-and-print capability
- Options for flat or on-edge envelope stacking with offsetting and tray tag printing
- Single and multichannel configurations available

| SPECS | |
|----------------------------------|--|
| Base cycle speed (insertions/hr) | > 25,000 for letters > 18,000 for 6" x 9" > 8,000 per hour (with input channel) |
| Envelope sizes | Minimum: 4" x 7" (100 mm x 180 mm) Maximum: 10" x 13" (254 mm x 330 mm) |
| Input Channel choices | High-speed cut sheet feeder: Up to 50,000 sheets per hour High-speed continuous form cutter: Up to 80,000 sheets per hour |
