

CLEVERON 402

The Next Generation of Automated In-store Package Retrieval

Cleveron 402 provides retailers and consumers with the industry's fastest and most efficient in-store order pickup experience. From expedited package inductions and retrieval to modular deployment options and self-optimizing storage capabilities, Cleveron 402 brings unprecedented benefits and features to traditional retail environments.

HOW IT WORKS

1. Customer places order online or via the retailer's app
2. Once order is ready for pickup, customer is notified via email or text with a unique pickup code
3. The customer scans their code and receives their order in less than 10 seconds.

KEY FEATURES

- ▶ Automation – Automate the customer pickup process
- ▶ 24/7 Accessibility – Enable convenient customer pickup
- ▶ Increased Modularity – Customizable capacity that easily integrates into existing environments
- ▶ Turnkey Project Management – From concept and design to installation and service
- ▶ Unprecedented Speeds – Induction and pickup in under 10 seconds

PROVIDE A QUICK AND CONVENIENT IN-STORE PICKUP EXPERIENCE

From speed to ease-of-use and enhanced personalization, the Cleveron 402 provides your customers with the frictionless in-store pickup experience they expect.

WORLD'S FASTEST ORDER INDUCTION AND PICKUP PROCESS

Reduce the time it takes to induct and retrieve an online order to as little as 7 seconds.

MODULARITY AT ITS BEST

Designed to fit into any store's interior wall or as a standalone unit, Cleveron 402 is dynamically configured to meet the current and future usage needs of today's retail environment.

EFFICIENT STORAGE

The Cleveron 402 continuously maximizes its internal storage and adjusts package locations based on historical usage and the dimensions of the induced packages for optimal storage capacity.

EXPANDED BRANDING CAPABILITIES

Customize the color and vinyl wrapping of your Cleveron 402 to dynamically promote to your unique brand and marketing initiatives.

THE BELL AND HOWELL DIFFERENCE

Bell and Howell is the leading provider of the world's most comprehensive automated click-and-collect portfolio. problems and service our customers' machines before they even know there might be an issue. Predictive maintenance services also allow us to see when and which parts are wearing down and hindering performance. When this happens, Cleveron 402 can proactively order parts and submit a service ticket, improving first-time fixes, reducing equipment downtime and increasing overall performance.
