

## The Industry's First Multi-User Automated Rx Storage and Retrieval System

BH Quick Rx is the first automated pickup solution to deliver simultaneous induction and retrieval capabilities. Serve several customers at once with a multi-portal configuration. Streamline the traditional prescription pickup process, reduce customer wait times, and free up pharmacy staff to focus on patient counseling and other services.

### HOW IT WORKS:

1. Pharmacist fills prescription, scans the unique identifier and inducts Rx into the QuickRx machine
2. System notifies customers with a unique code their Rx is ready for pickup
3. Customer walks up to terminal and scans code, Rx is dispensed in less than 30 seconds

### KEY FEATURES

- ▶ **24/7 Accessibility** – Quick and easy Rx pickup
- ▶ **Improved Pharmacy Workflow** – Simplified Rx validation, storage and retrieval
- ▶ **Automated Process** – Reduce customer wait times
- ▶ **Multi-User Configuration** – Serve multiple customers at once
- ▶ **Dual-Portal Accessibility** – Simultaneous induction and retrieval
- ▶ **Online Assistance or Consultation** – Optional two-way video chat with pharmacist
- ▶ **Deployment Flexibility** – Integrate into the pharmacy counter, drive-thru, or as a free-standing unit

## SIMULTANEOUS INDUCTION & RETRIEVAL

With one induction terminal for the Pharmacist (typically behind the pharmacy counter) and two or more retrieval terminals for customers, BH QuickRx serves multiple customers at once, even while the pharmacist is entering new prescriptions into the system.

## DEPLOYMENT FLEXIBILITY

Designed to integrate into existing pharmacies, BH QuickRx requires no special rigging or construction and uses standard office power.

## ONLINE ASSISTANCE OR CONSULTATION

With capabilities to enable 24/7 access to a pharmacist via video chat during extended pharmacy hours, customers can conveniently and securely consult a pharmacist while they pick-up their prescriptions even when the pharmacy is closed.

## AUTOMATED NOTIFICATION PROCEDURES

Once a customer's prescription is filled, an automated notification alerts a customer via the pharmacy's app, text or email with a scannable barcode or unique code.

## ADDITIONAL DEPLOYMENT CONCEPTS

BH QuickRx can be deployed as a wall unit at the pharmacy counter, a drive-thru or freestanding unit inside or outside the pharmacy.

Built-in Payment and Rx Validation Functionality

Customers are taken through a step-by-step validation and payment process to streamline the prescription pickup experience.

## EXTENDED BRANDING CAPABILITIES

Customize the machine's look and feel to promote your unique brand or marketing campaign.

## THE BELL AND HOWELL DIFFERENCE

Bell and Howell is the leading provider of the world's most comprehensive automated click-and-collect portfolio. Our world-renowned service and support infrastructure, insight-producing data analytics, and experience deploying solutions at scale has provided us with a deep

## COMMON SPECS

<b>Dimensions:</b> (based on 3 portal configuration)	Height: 82" Width: 60" (80" when portals are open for maintenance)

understanding of the unique complexities of the retail space.

Bell and Howell's extensive service footprint is backed by 70+ years' experience in industrial equipment and mechatronics, with a network of more than 800 highly-skilled service engineers. Our remote monitoring and IoT-enabled services enables us to remotely diagnose problems and service our customers' machines before they even know there might be an issue. Predictive maintenance services also allow us to see when and which parts are wearing down and hindering performance. When this happens, BH QuickRx can proactively order parts and submit a service ticket, improving first-time fixes, reducing equipment downtime and increasing overall performance.
