

# Apollo Print System

Affordable, High-Resolution Inkjet Printing

## Powerful System Controls, Outstanding Print Quality, Unbeatable Low Price

The Apollo is a portable, easily configurable, high-resolution inkjet printer. Based on HP's proven TIJ 2.5 technology, Apollo produces high-quality images with print resolutions from 110 to 660x600 dpi. All the printer elements are fully integrated inside the printer's body, offering unprecedented portability, installation flexibility, and serviceability.

The extensive Apollo print-head suite allows you to configure and deploy a system that works best to suit your printing needs. Choose from a variety of HP inks, including versatile black, spot colors in yellow, red, green, blue (porous), and micro black (aqueous coat), to produce dark, crisp images on a wide range of substrates. The Apollo's configuration also makes it easy to maintain, clean, and replace ink cartridges, maximizing your production uptime.

### Key Features & Benefits

Durable, modular,  
easily upgradeable design

Powerful, easy-to-use job  
and print control software

Rotate print, graphics and barcodes  
for unparalleled print flexibility

Apollo is an affordable, easily configurable, high-resolution inkjet print system that offers unparalleled portability and installation flexibility, while delivering incredibly high-resolution images.

## Built to Grow with Your Operation

The Apollo print system's modularity, along with its open architecture, enables print heads to be added as needed. This allows you to add print capacity to your system, while also enabling you to mix and match with a wide range of inline equipment, including:

- Feeders
- Drying/Curing Stations
- Flip-overs
- Inserters
- Transports
- Tabbers
- Conveyors
- Camera Systems

## Bell and Howell Service Solutions

### Transforming business challenges into competitive advantages

Maximum uptime and availability starts here. From an extensive service footprint, 40,000+ parts at 400+ stocking locations, to the best software service and support in the industry, we've got you covered. We bring a long history and expertise in fixing a wide variety of print and mail equipment. So, no matter how you integrate the Apollo print system into your mail manufacturing environment, we ensure that your operation runs efficiently.
