*Quick*Collect *GO!* POD™

Self-Contained Outdoor Automated Pickup Solution

Flexibility and Convenience in a Hassle-Free Design

Launch and expand your online pickup program with automated pickup portals that can be quickly deployed in your store parking lot or in remote locations. The QuickCollect *GO!* POD™ provides an enhanced customer experience, enables 24/7 operations, and improves operational efficiencies. The self-contained outdoor solution can feature multiple customer portals, support simultaneous loading and pickup, and seamlessly integrate into your operations. This solution can be configured with climate control to support temperature-sensitive products in grocery, pharmacy, and retail environments.

> The QuickCollect *GO!* POD™ modernizes pickup by improving operations, expanding revenue, and enhancing the customer experience.

Key Features and Benefits

Easy outdoor deployment with improved operational and space efficiency

Simultaneous loading and pickup with 24/7 availability

Enhanced customer experience with multiple customer portals

Quick and Easy Installation

The QuickCollect *GO!* POD's™ modular prefabricated design minimizes installation and site requirements. With drop-in installation, the QuickCollect *GO!* POD™ can be deployed in a variety of locations bringing convenient e-commerce access to your customers.

Focus on Efficiencies

The QuickCollect *GO!* POD™ is designed for efficient customer experiences and reduces congestion with multiple customer portals presenting up to three totes at a time. The QuickCollect *GO!* POD™ further reduces customer disruption by allowing for simultaneous loading and pickup. It supports ambient, refrigerated, and frozen products without the need to allocate separate space, which reduces capacity waste.

Expand with Confidence

The QuickCollect *GO!*™ Family is built on a common platform using the same innovative technology and software. The QuickCollect *GO!* POD™ can work as a standalone system or integrate into different software environments with easy integration. As you expand your e-commerce program, the QuickCollect *GO!*™ Family grows with you making onboarding easy and painless.

How the QuickCollect *GO!* POD™ Works for Customers:

1. A customer places an order online.

2. Once an order is ready for pickup, the system automatically sends the customer a unique pickup code via email and/or text message.

3. When the customer arrives, they scan their code and quickly receive their order.
