COMMANDER

Inserting Systems

Mighty Performance. Smaller Footprint.

A simplified, reliable inserter to automate operations of any size.

Modular and flexible, the Commander is an ideal solution for offices, small/mid-sized mail production operations, or supplementing large production environments.

The Commander is designed for easy set-up and quick changeover between jobs, enabling faster order turnaround and improved operational workflows. The multi-format workhorse enables businesses to dynamically process up to 6,000 pieces per hour, with a duty cycle of 750,000 per month.

Key Features & Benefits

Insert station multiple feed functionality: Pre-set number of items fed from a single station

Insert stations that accommodate single sheets, books, cd's, stapled sets, plus common inserts such as return envelopes, brochures, etc.

Office friendly sizing, with a small footprint and 110Vac single phase power requirement

A multi-format workhorse, the Commander enables businesses to dynamically process up to 6,000 pieces per hour, with a duty cycle of 750,000 per month.

The Perfect Stepping Stone

High performance without the higher investment

The Commander is targeted for those who are looking to add capacity to their current production line, augment their inserting operation from manual hand-filling or when one cannot justify the investment and footprint associated with higher-end production models.

Smaller footprint does not mean sacrificing efficiency, versatility and durability. Insert feeders are designed to handle a wide range of products including: single sheets, cards, reply envelopes, pre-folded product, stapled sets, cd's and books.

The Commander uses a simple-to-use touch-screen console for quick setup, job programing and error messaging/recovery. Reading functionality enables the processing of personalized packages including the matching of multiple inputs.
