

The Art of Easy

Expand and Simplify Food Access in the Fight Against Hunger

ADD SECURITY, SAFETY, AND DIGNITY TO YOUR FOOD DISTRIBUTION PROGRAM

Contactless food distribution makes life easier for the whole community. Offer privacy and convenience with 24/7 food and meal pickup anywhere in your community with the QuickCollect GL. Several Feeding America Food Banks across the U.S. already use these temperature-controlled, food-safe locker systems to revolutionize how they distribute fresh and healthy meals in their communities.

In North Carolina, the [Second Harvest Food Bank of Northwest NC](#) is reaching new members of their community with their new QuickCollect GL lockers. They recently installed the lockers at a local elementary school, providing greater access for families in need. In Pennsylvania, the [Greater Pittsburgh Community Food Bank](#) uses the QuickCollect GL to help address the [Meal Gap](#) in their area.

Extend Your Reach

- Can go anywhere: food banks, community centers, schools, churches, etc.
- Enables 24/7 access to food items
- Only need a solid surface, electricity, and internet

Easy to Use

- Installed and operational in one day
- Recipients scan a code and retrieve their food items.
- Complete Care service and software included

Flexible to Meet Your Needs

- Multiple temperature zones, from frozen to warm, keep food safe
- Easily accommodates growing demand
- Sharable across multiple community groups

"(Our mission is) ...to help the hungry in a way that welcomes the clients and makes life easier for them to get their food. ... This locker program is the solution!"

- Sue Otto, Center of Hope, Ambridge, PA

Center of Hope is a partner organization of the Greater Pittsburgh Community Food Bank

According to Feeding America, *"When our communities — especially children — have access to healthy, well-balanced diets, everyone benefits."* Partnering with QuickCollect Solutions provides a more secure and convenient way of connecting communities to fresh and healthy food with the contactless, food-safe locker systems.

Nourish the communities you support with enhanced means of food distribution.

How it Works:

The QuickCollect GL makes life easier for you, your volunteers, and the families you serve. Now, you can deliver fresh and healthy food items to those who need it most - when and where it's convenient for them, 24 hours a day, seven days a week.

Our system automatically notifies recipients when their items are ready to be picked up. All they do is scan a pickup code at the kiosk and retrieve their food items!
