

PRODUCER 250 AND 400TM

Inserting System

Flexible, High-Speed Transactional Inserters

When mailpiece integrity matters, trust Producer™

Bell and Howell's Producer Transactional Mail Inserters are designed for environments that demand mailpiece quality and high production volume while ensuring low operating costs and flexibility.

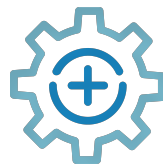

Efficiently, the Producer 250™ process up to 16,000 letters per hour and 12,000 flats per hour, while the Producer 400™ processes letters at speeds of 20,000 pieces per hour.

The Producer™ inserters offer single and multichannel high-speed continuous form and cut sheet inputs, with a robust heavy-duty folder for high-page counts. Additional options include a sub-setting for higher page counts, and an automatic format turn module for quick change over between letter and flats size applications.

Key Features & Benefits

Robust cut sheet and continuous form input channels with heavy-duty folding

True "in-line" inserting process reduces rework and operator fatigue

Automatic rejection of collation errors in both the input channel and the base system

The true in-line inserting allows envelopes to feed in the same direction as the inserts and input channel, maximizing floor space and improving operational workflow.

The In-Line Advantage

Up the output, optimize workflow

The Producer™ family of insert feeders includes rotary, friction, shuttle, in-line feeder/folders and specialty feeders. Allowing for configuring an ideal solution for your environment to yield the highest possible performance and application flexibility.

The true in-line inserting approach allows for envelopes to feed in the same direction as the inserts and input channel, maximizing valuable floor space while improving operational workflows and efficiencies.

Our Navigator™ system controller combines all these latest technologies into a graphical user interface. Enabling dramatic improvements in usability, operator and system productivity, reporting statistics and overall system management.

Optional Features

Customize your transactional mail solution

- Bell and Howell's JETVision® technology to ensure maximum insert and document integrity.
- Options for flat or on-edge envelope stacking with offsetting for zip sort
- Integrated monochrome or color ink-jet addressing with read-and-print capability

	▶ Input Channel Choices:	High-speed cut sheet feeder: Up to 50,000 sheets per hour High-speed continuous form cutter: Up to 80,000 sheets per hour	High-speed cut sheet feeder: Up to 50,000 sheets per hour High-speed continuous form cutter: Up to 80,000 sheets per hour

Bell and Howell Service Solutions

Transforming business challenges into competitive advantages

Maximum uptime and availability starts here. From an extensive service footprint, 40,000+ parts at 40+ stocking locations, to the best service and support in the industry, we've got you covered. By combining turnkey project management, advanced analytics and flexible maintenance plans, you'll have the complete solution to ensure that your organization is running more efficient for longer.
