# QuickCollect GL™

## Introducing the Industry's Most Versatile Grocery Locker

## Temperature-Customizable Locker System for Grocery Pickup

The QuickCollect GL™ is a modular, temperature-regulated smart locker solution designed for both indoor and outdoor environments. Ideal for grocers who are looking to implement a scalable grocery pickup program, automate manual pickup programs like curbside pickup, or extend their pickup service as a remote pickup point. The QuickCollect GL™ system enables grocers to remotely adjust the locker temperature setting on a "per-column" basis to meet any usage needs.

### How it works:

1. Customer places order online or via the retailer's app

2. Once order is inducted in the QuickCollect GL™, customer is notified via email or text with a unique pickup code

3. Customer scans their code at the console and thelocker with their order opens

## Key Features and Benefits

Remotely adjust column temperatures

Proven durability in harsh outdoor environments

Easy to install, service and integrate into existing software systems and workflow

> The QuickCollect GL™ empower grocers to easily add a temperature-controlled locker system indoor, curbside or as a remote pickup point. Ensure food quality controls while expanding service reach by remotely configuring column temperatures to meet any food safety requirements.

## Deliver a Convenient Pickup Solution at Scale

As shoppers adopt and use Buy Online, Pickup In Store (BOPIS) services, today's leading grocers are shifting to meet demand. Automating online order pickup programs and manual pickup processes, such as curbside pickup, help meet customer delivery speed and quality expectations.

Already have a delivery program in place? Extend your brand's reach by offering remotely located pickup points closer to businesses or high-traffic areas. This allows you to maintain quality control for frozen or prepared hot foods while meeting your customers when and where it's most convenient.

QuickCollect GL™ is easy-to-install and expandable to meet any volume needs. Our API easily and securely integrates into your existing OMS system. If you are looking for a cost-effective, efficient and flexible solution to develop or scale your online grocery pickup program, the QuickCollect GL is the perfect solution.
