

QuickCollect XL

Automated Curbside Grocery Pickup Solution

Redefining the Curbside Grocery Pickup Solution

As online shopping becomes more prevalent in how we get our groceries, even the most efficient manual curbside pickup system will need to be enhanced with automation. QuickCollect XL is an automated curbside order retrieval system that empowers customers to pick up their perishable online grocery orders when it is convenient, 24/7.

How it works:

1. Customer places order online or via the retailer's app or web browser
2. Once order is ready for pickup, customer is notified via email and text with a unique pickup code
3. The customer drives up to the pickup station, scans their code and receives their order in as little as 30 seconds

Key Features & Benefits

Streamline the grocery order pickup experience with scalable automation

Dual-portal accessibility with simultaneous induction and retrieval

Deploy as a standalone pickup location or building extension

QuickCollect XL is designed to automate the grocery order storage and distribution processes. From frozen to ambient temperatures, this drive-up system is as easy-to-use as it is captivating.

Improve Customer Satisfaction and Retention

The QuickCollect XL empowers grocers to more efficiently and securely store and manage pickup inventory to simplify and streamline internal processes. Associates can induct up-to 6 totes at one time, while customers can simultaneously retrieve their orders at up-to 7 pickup stations in as little as 30 seconds. Our adaptable software easily integrates into your organization's API and OMS.

Turnkey Project Management

From conception and design to installation and service, Bell and Howell manages every aspect of your unique click-and-collect solution. We bring together leading solution providers and combine them with Bell and Howell technology and know-how to deliver a world-class drive-up and grocery pickup experience designed to provide the most convenient shopping experience possible.
